

QUALITY, HEALTH, SAFETY & ENVIRONMENT (QHSE) POLICY

Our "Vision" is to be a premium Aluminium Extrusions major worldwide, who meets the inevitable challenges of the new era with confident and sustainable innovation.

To achieve this vision, we shall comply with applicable, legal, regulatory requirements and code of conduct of the Al Ghurair Group.

Our "Mission" is to provide need-of-the-hour products, professional support and services to our customers that enable us to meet our obligations company's objectives.

Our "Aim" is to ensure safe business operations which will not harm our people, environment, and our society.

To achieve above Vision & Mission, GulfEx is committed to;

- Quality, Health, Safety and Environmental (QHSE) indicators are defined in compliance with the organization's objectives and regulatory requirements, which are measurable and monitored at regular intervals;
- All employees are accountable, shall perform all business processes in-line with the QHSE requirements to achieve the organization's objectives and targets;
- Adequate QHSE trainings to all the employees, contractors, visitors shall be provided covering topics related to general and task specific business processes which enables them to conduct their activities safely;
- Prevention of pollution, injury and ill health that may arise from the business processes and surroundings;
- Reporting of all Health & Safety incidents in accordance with international standard, formally investigated with actions taken to prevent recurrence and ensure key lessons are learned and shared across the organisation;
- Develop and maintain Business Continuity and Contingency Plans. Validate those regularly to ensure its effectiveness;
- Encourage all its employees, contractors, customers, neighbours, and stakeholders to adopt policies to continually improve efficiencies and protect the health, safety, and environment;
- Attend to its employees, contractors, customers, neighbours, and stakeholders to ensure all valuable input is considered in the decisions impacting workplace QHSE;
